Brooks Tree Farm

Wholesale Seedlings and Plugs for Every Need.

2015-2016

Check out our Plugs

Noble Fir is considered the premier Christmas tree in the Pacific Northwest and commands the best price. Fast growing Christmas tree.

Norway Spruce is grown in much of the USA, it tolerates a wide range of soils and takes shearing well. Good cold climate Christmas tree, also used as understock for all Spruce grafting.

Colorado Spruce has a wide variety of colors, some more blue than others. Native to the Rocky Mountains, but used all over as an ornamental species. Needles can be sharp to the touch.

Ponderosa Pine grows very straight and tall and has long needles. The Willamette Valley seed source was nearly extinct, it tolerates wet soil.

Scotch Pine grows in most of the temperate regions of the world. Needles in bundles of two, short, usually green. Good for Christmas Trees and understock. Spanish strains usually for Christmas trees, French Blue for ornamental uses.

Japanese Black Pine is narrow and fast growing, for colder climates. Traditional for Japanese gardens, it takes training well.

Coast Redwood are Earth's tallest trees, one reaching 379', they are fast growing evergreens. The trunks are straight and the soft, bright green needles are flat. They prefer mild foggy climates and cool moist soils but will grow in sunny, wet locations.

Giant Sequoia is a fast growing conifer, often grafted with weeping form. Also popular as evergreen screen.

Rigid Tubes protect from grazing and gnawing, they will photodegrade over time.

Bamboo Stakes anchor rigid tubes in the ground and come in 30" x 48" lengths.

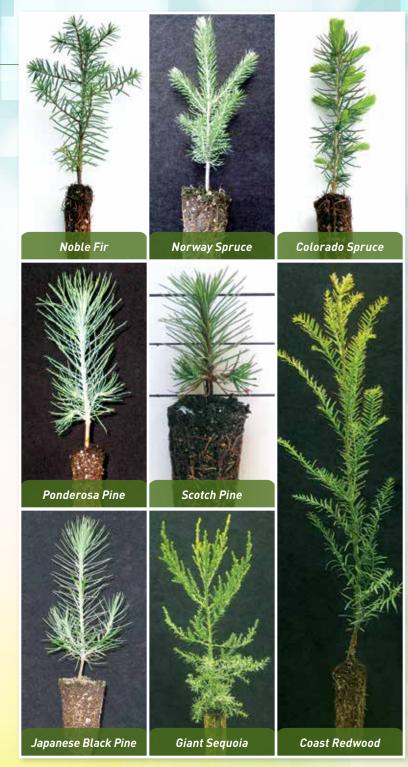

100 –	\$40.00
Box of 250 –	\$95.00
36" Rigid Tubes	
100 –	\$50.00
Box of 250 –	\$115.00
30" Bamboo Sta	kes
100 –	\$16.00

Age classifications and transplants

Seedlings are designated by their age and growing history. Each digit represents where and for how long the tree spent its growing time. Add all the digits to know the total age of the plant. The information is useful because you can better understand what you're getting and control what you pay for.

Transplanting greatly increases root mass and stimulates the stems and branching to grow thicker but the top is usually slowed. The result is a stocky and well balanced tree or shrub. The higher cost covers the extra year of growing time, wider field spacing and additional handling.

- **1-0** The plant is 1 year old and has never been transplanted.
- **1-1** The plant is 2 years old: 1 year in a seed bed and 1 in a transplant bed.
- **2-0** The plant is 2 years old, never transplanted.
- **2-1** The plant is 3 years old: 2 years in a seed bed and 1 year in a transplant bed.
- P-1 The plant is 2 years old: 1 year in a greenhouse plug and 1 year in a transplant bed.
- **P/F** The plant is 1 year old. It grew 10-12 weeks in a greenhouse and then transplanted mid summer to finish in the field. The style is suitable for native plants that are very aggressive so that growth is controlled and balanced. You get the advantages of both greenhouse and field growing in a single season.

Field Planning

4x5 = 2,730 per acre	5x6	=	1,450 per acre
5x5 = 1,740 per acre	10x10	=	435 per acre
6x6 = 1,210 per acre	20x20	=	100 per acre

Ordering and Planting Tips

- > Order as soon as you know what you will need. Many items sell out early.
- > Prepare fields in the fall so you'll be ready for a February/March planting.
- February 15 April 1 provides mild, cool, rainy conditions with little chance for any extreme weather conditions. Take the earliest convenient opportunity to plant. Don't wait for a second window, some years it's a long time coming!
- Pick up the trees when you are ready to plant, we'll work with your schedule. Never let the trees sit un-refrigerated and waiting. Never stack bags in a pile.
- Always keep the roots wet. Take only a few trees out of the bag at a time and cover the remaining trees with a wet towel. Put the trees to be planted in a bucket with a few inches of water. Add a root dip to the water if irrigation isn't available. Be sure all roots are directed downward and gently covered to just above the root zone.

Terms and Conditions

Thank you for considering our products. We work hard to provide multiple size options on healthy plants at the best possible price. Your success with our products is always our prime goal.

Containers

We now have many natives and conifers in Band Pots and #1 (approx 1 gallon). As usual, we'll offer volume discounts. Combine any combination of containers for the best price. Bare root tree and plug discounts are calculated by the number purchased in each size and specie.

All of the packing and shipping takes place at the main Brooks farm. Our onsite refrigeration facilities provide temporary cold storage of up to three million trees at a time. Trees can be held for short periods in our coolers but please be aware that most species will perform best when shipped fresh. Some species will not tolerate extended periods in storage. Claims will receive consideration only if made within 10 days of pickup. In western Oregon we recommend planting between February 15 and April 1. You will find your survival rate will greatly increase by planting in this optimum six-week window. Preparing fields in the fall will make this option viable.

To assure quick, efficient loading of your complete order please allow three days prior notice. You may pick up at the nursery or ask to have your trees shipped by local truck. FedEx, UPS and Delta airfreight are also available. Cost is actual freight plus \$5.00 per package boxing charge (\$10.00 for pots) if the order needs to be repacked or palletized.

Pricing is determined by the number purchased in each size and specie, providing no special packing or breaking down of packaging is requested. In order to offer the best prices we try to minimize costly labor for special repacking. If a bag needs to be broken down and hand re-counted a higher rate will apply. Species vary as to amount in each bag; we'll usually ask if you can use a full bag. Large orders that pick up full bags on multiple occasions will receive the discounted composite rate.

A 25% deposit is required to reserve an order, payable when order is confirmed. In the event of a shortage, orders without a deposit may be canceled or reduced. A 2% discount is available for orders exceeding \$100.00 and pre-paid by December 31st. Payment prior to shipment is required on all orders until credit is established by application and review. Accounts over 30 days will be charged a service charge (up to 12% APR). Cancellations made after February 1 will forfeit deposit. All orders not picked up or paid in full by March 1 will be subject to resale. Volume Discounts are available for orders exceeding 100,000 total plants. Please inquire for details.

Summer plugs are available on a limited basis. Some fast growing Pacific NW native species can be potted from plugs in mid summer and can finish as a #1 (approx 1 gallon) by fall. Fall plugs allow nurseries to move potting from the busy spring shipping season to a time when labor is more readily available. Conifers are available after Sept 1. A full line is available during dormant season, depending on early orders and shipments.

Visit **www.BrooksTreeFarm.com** for information on land preparation, ordering, planting and photos.

Promote Your Company with Green Gifts

Do you get calls for inexpensive green gifts? Ever wish you could offer a small item at an event but don't have anything suitable in your own line? Our seedlings, plugs and small potted trees can be tagged with your company name.

We can take all the work out of green promotional gifts. Suitable for trade shows, weddings, memorials, special events or commemorations, green gifts are hot - and we make them easy and affordable. Available options come in two basic formats from our regular wholesale line with optional gift packaging, ready to go.

We'll do all the work. Plugs can be packaged in plastic sleeves, custom printed with white stars across the root zone, then sealed at the top with a four color card. Larger potted plants are available packaged in green or gold gift boxes. The boxes fit over any of the plants growing in the 2 7/8" x 5 1/2" band pots. We can also provide the component trees, bags or boxes for you to assemble and customize.
