Norway Spruce is grown in much of the USA, it tolerates a wide range of soils and takes shearing well. Good cold climate Christmas tree, also used as understock for all Spruce grafting.

Colorado Spruce has a wide variety of colors, some more blue than others. Native to the Rocky Mountains, but used all over as an ornamental species. Needles can be sharp to the touch.

Ponderosa Pine grows very straight and tall and has long needles. The Willamette Valley seed source was nearly extinct, it tolerates wet soil.

Mugo Mughus is a slow growing pine that reaches 8'. Ornamentally used in landscapes, embankments, rock walls, Mughus is very resistant to cold and drought.

Salal is a low ornamental shrub. The leaves are often used by florists. Native to the west coast Salal is often found on embankments on the coast or on forest floors.

Giant Sequoia is a fast growing conifer to 200' from California, often grafted with weeping form. Also popular as large scale evergreen screen.

Root Dip

Horta Sorb

1 Pound	\$25.00
4 Pounds	\$80.00
10 Pounds	\$150.00

Protect your investment by dipping roots in a super absorbent root protecting hydrogel prior to planting. The gels attract moisture and hold it in the root zone keeping it accessible to the roots during dry periods. The polymer gels can absorb hundreds of times their weight in water and release the moisture to the plant multiple times, providing water to the root zone and protecting the plants during roots establishment. Horta Sorb is a dry powder that is mixed on demand so surplus can be stored for future use.

Planting Supplies

Rigid Tubes are easier to install than the expandable netting. Simply slide a tube over each planted tree. Secure with one or two **Bamboo Stakes** woven into the net and pushed 6" into the soil. One bamboo will secure the net tube but animals or wind may dislodge covers with only one stick. Tubes are available in 24" and 36" lengths, both 3.25" or 4" wide. Use the 3.25" wide tubes for narrow native shrubs or thin conifers. Use the 4" wide tubes for standard conifers and transplants.

24" Rigid Tubes	100	Box
24" x 3.25" (Box of 250)	\$40.00	\$95.00
24" x 4" (Box of 200)	\$46.00	\$86.00
36" Rigid Tubes	100	Box
36" x 3.25" (Box of 250)	\$50.00	\$115.00
36" x 4" (Box of 250)	\$60.00	\$125.00
30" Bamboo Stakes	100	1000
	\$16.00	\$150.00
48" Bamboo Stakes	100	1000
	\$23.00	\$210.00

Expandable Netting

protects trees from grazing, allows air circulation, and photodegrades after 2 years.

1000' Roll - \$85.00

	SEED SOURCE	DESCRIPTION	SIZE	ELEVATION	PRICE PER 100 100-475	PRICE PER 1000 500+
<i>Abies concolor</i> Concolor Fir	Swift Silver	Silver white frost on blue needles. Requires cold for good needle retention. Well drained soils. Plugs	6"-12"		60.00	540.00
<i>Abies grandis</i> Grand Fir	Clearwater Orch	Flat, very fragrant medium green needles on gold twigs. Tolerates moist soil and light shade. Plugs	6"-12"		60.00	540.00
<i>Abies procera</i> Noble Fir	053, 452, Host Orch Run, Silkeborg, Silver Mt	Considered the premier Christmas tree in the Pacific NW and commands the best price. Plugs	6"-12"		60.00	540.00
<i>Calocedrus decurrens</i> Incense Cedar	261	Sturdy, dark green foliage is tipped with bright yellow buds in November and December. Plugs	3"-6"		60.00	540.00
<i>Cedrus deodara</i> Deodar Cedar	India	Favored Cedrus under stock. Fast growing conifer is often grafted but natural blue/green needles are also attractive. Plugs	6"-12"		60.00	540.00
<i>Gaultheria shallon</i> Salal	261	Glossy, oval leaves on low evergreen shrub. Greens have commercial value to florists. Plugs	3"-6"	1000'	60.00	540.00
<i>Larix leptolepis (L. kaempferi)</i> Japanese Larch	Japan	Larix under stock, very cold-hardy roots, to zone 2. Plugs	3"-6"		56.00	510.00
<i>Picea abies</i> Norway Spruce	Bulgaria	Widely grown in much of the USA it tolerates a wide range of soils and accepts shearing well. Plugs	3"-6"		56.00	510.00
<i>Picea pungens</i> Colorado Spruce	Apache, Kaibab Nat'l Forests	Seed from proven natural sources consistently yielding a high percentage of blues. Plugs Plugs	3"-6" 6"-10"		56.00 60.00	510.00 540.00
<i>Pinus contorta</i> Shore Pine	053	Short, rich green, two needles per bundle. Coastal form of P. contorta, for mild climates. Plugs	3"-6"	500'	56.00	510.00
<i>Pinus contorta, murrayana</i> Lodgepole Pine	681	A good two needle stock where cold-hardiness is needed. Growth is fast and straight. Plugs	3"-6"	4500'	56.00	510.00
<i>Pinus flexilis</i> Limber Pine	Arapaho Nat'l Forest	Native to SW United States as far west as the Cascade Mountains of Oregon. Small tree to 65', naturally grows at high elevations in Rocky Mountains, Cascades, and Black Hills. A white pine, needles are long, blue. 5/bundle. Plugs	3"-6"	4500'	56.00	510.00
<i>Pinus jeffreyi</i> Jeffrey Pine	Sierra Mts, CA	Close relative to Ponderosa Pine, it has longer needles, the barrel shaped cones are bigger. Plugs	3"-6"		56.00	510.00
<i>Pinus mugo, mughus</i> Swiss Mountain Pine	Himalayan Mts	From a lower elevation than the Pumilio this tree can get to 8'. The needles are slightly longer and coarse than Pumilio. It's faster growing. Usually sheared into tight mound. Plugs	3"-6"	500'	56.00	510.00
<i>Pinus mugo, pumilio</i> Dwarf Swiss Mountain Pine	Himalayan Mts	A slow growing pine. Mature height is rarely over 4'. Slower growing than Mughus and has a finer texture to the needles. Usually sheared into a tight, formal, low mound. Plugs	3"-6"	500'	56.00	510.00
<i>Pinus nigra</i> Austrian Pine	Slovakia	Fast growing pine with velvety white candles, needles 4"-6" long on upright branches. Plugs	3"-6"		56.00	510.00
<i>Pinus ponderosa</i> Ponderosa Pine	882 Willamette Valley	The Willamette Valley seed source was once near extinction. Fast growing, tolerates wet soil. Seed from east of the Cascades prefers hot dry soil. Grows straight & tall with long needles. Plugs Plugs	6"-12" 6"-12"	4000' 500'	60.00 60.00	540.00 540.00

Plugs

	SEED SOURCE	DESCRIPTION	SIZE	ELEVATION	PRICE PER 100 100-475	PRICE PER 1000 500+
<i>Pinus strobiformis</i> Southwestern White Pine	Lincoln Nat'l Forest	Alternate under stock for 5 needle for SW regions of USA. Preferred for alkaline soils. Plugs	3"-6"		56.00	510.00
<i>Pinus strobus</i> Eastern White Pine	North Carolina	SOLD OUT Favorite under stock for five needle pines but is very sensitive to wet roots. Keep them dry. Plugs	3"-6"		56.00	510.00
<i>Pinus sylvestris</i> Scotch Pine	French, Spanish	Hardy under stock for two needle pines. It grows in a very wide range of climates. Plugs	3"-6"		56.00	510.00
<i>Pinus thumbergii</i> Japanese Black Pine	Japan	Fast irregular habit. Salt and wind tolerant, 2 needle pine. Generally small and narrow, can reach 75'. Cold hard to 0. Popular for bonsai, poodling. Plugs	3"-6"		56.00	510.00
<i>Pseudotsuga menziesii</i> Douglas Fir	(062, 072, 251, 452) (052 GI HG, S OR Mix, Silver Mt GI)	Oregon's primary timber specie. Fast growing, also good for Christmas trees. Plugs Plugs	6"-10" 6"-10"		60.00 60.00	540.00 540.00
Native Willows		Usually multi-stemmed shrubby trees to 35', sometimes more. Willamette Valley seed sources.				
<i>Salix hookeriana</i> Hookers Willow		Plugs	6"-12"	500'	63.00	570.00
<i>Salix lucida, lasiandra</i> Pacific Willow			12"-24"		68.00	610.00
<i>Salix scouleriana</i> Scouler Willow			24"-36"		71.00	640.00
<i>Salix sitchensis</i> Sitka Willow						
<i>Sequoia sempervirens</i> Coast Redwood	094	Famous for immense size, they will grow to 300' or more. Need cool, moist, mild sites. Plugs	6"+	2500'	60.00	540.00
<i>Sequoiadendron giganteum</i> Giant Sequoia	Mt. Home Forest	A fast growing conifer that can reach 200'. Prefers moist sunny sites. Plugs	3"-6"	2500'	56.00	510.00

Grafting Under Stock

	SEED SOURCE	DESCRIPTION	SIZE	ELEVATION	PRICE PER 100 100-475	PRICE PER 1000 500+
<i>Abies balsamea</i> Balsam Fir	Cooks Blue	Hardy under stock for all true firs. Most commonly used true fir root stock. 3-0 Bare Root	6"-12"		62.00	560.00
	2 7/8" x 5 1/2"	Band Pots	Caliper 3/8"-1/4"	36 per flat	1.55 ea	1.45 ea

Age classifications and transplants

Seedlings are designated by their age and growing history. Each digit represents where and for how long the tree spent its growing time. Add all the digits to know the total age of the plant. The information is useful because you can better understand what you're getting and control what you pay for.

Transplanting greatly increases root mass and stimulates the stems and branching to grow thicker but the top is usually slowed. The result is a stocky and well balanced tree or shrub. The higher cost covers the extra year of growing time, wider field spacing and additional handling.

1-0 The plant is 1 year old and has never been transplanted.

1-1 The plant is 2 years old: 1 year in a seed bed and 1 in a transplant bed.

2-0 The plant is 2 years old, never transplanted.

2-1 The plant is 3 years old: 2 years in a seed bed and 1 year in a transplant bed.

P-1 The plant is 2 years old: 1 year in a greenhouse plug and 1 year in a transplant bed.

P/F The plant is 1 year old. It grew 10-12 weeks in a greenhouse and then transplanted mid summer to finish in the field. The style is suitable for native plants that are very aggressive so that growth is controlled and balanced. You get the advantages of both greenhouse and field growing in a single season.

Field Planning

4x5 = 2,730 per acre	5x6 = 1,450 per acre
5x5 = 1,740 per acre	10x10 = 435 per acre
6x6 = 1,210 per acre	20x20 = 100 per acre

Ordering and Planting Tips

- › Order as soon as you know what you will need. Many items sell out early.
- › Prepare fields in the fall so you'll be ready for a February/March planting.
- › February 15 – April 1 provides mild, cool, rainy conditions with little chance for any extreme weather conditions. Take the earliest convenient opportunity to plant. Don't wait for a second window, some years it's a long time coming!
- › Pick up the trees when you are ready to plant, we'll work with your schedule. Never let the trees sit un-refrigerated and waiting. Never stack bags in a pile.
- › Always keep the roots wet. Take only a few trees out of the bag at a time and cover the remaining trees with a wet towel. Put the trees to be planted in a bucket with a few inches of water. Add a root dip to the water if irrigation isn't available. Be sure all roots are directed downward and gently covered to just above the root zone.

Terms and Conditions

Thank you for considering our products. We work hard to provide multiple size options on healthy plants at the best possible price. Your success with our products is always our prime goal.

Containers

We now have many natives and conifers in Band Pots and #1 (approx 1 gallon). As usual, we'll offer volume discounts. Combine any combination of containers for the best price. Bare root tree and plug discounts are calculated by the number purchased in each size and specie.

All of the packing and shipping takes place at the main Brooks farm. Our onsite refrigeration facilities provide temporary cold storage of up to three million trees at a time. Trees can be held for short periods in our coolers but please be aware that most species will perform best when shipped fresh. Some species will not tolerate extended periods in storage. Claims will receive consideration only if made within 10 days of pickup. In western Oregon we recommend planting between February 15 and April 1. You will find your survival rate will greatly increase by planting in this optimum six-week window. Preparing fields in the fall will make this option viable.

To assure quick, efficient loading of your complete order please allow three days prior notice. You may pick up at the nursery or ask to have your trees shipped by local truck. FedEx, UPS and Delta airfreight are also available. Cost is actual freight plus \$5.00 per package boxing charge (\$10.00 for pots) if the order needs to be repacked or palletized.

Pricing is determined by the number purchased in each size and specie, providing no special packing or breaking down of packaging is requested. In order to offer the best prices we try to minimize costly labor for special repacking. If a bag needs to be broken down and hand re-counted a higher rate will apply. Species vary as to amount in each bag; we'll usually ask if you can use a full bag. Large orders that pick up full bags on multiple occasions will receive the discounted composite rate.

A 25% deposit is required to reserve an order, payable when order is confirmed. In the event of a shortage, orders without a deposit may be canceled or reduced. A 2% discount is available for orders exceeding \$100.00 and pre-paid by December 31st. Payment prior to shipment is required on all orders until credit is established by application and review. Accounts over 30 days will be charged a service charge (up to 12% APR). Cancellations made after February 1 will forfeit deposit. All orders not picked up or paid in full by March 1 will be subject to resale. Volume Discounts are available for orders exceeding 100,000 total plants. Please inquire for details.

Summer plugs are available on a limited basis. Some fast growing Pacific NW native species can be potted from plugs in mid summer and can finish as a #1 (approx 1 gallon) by fall. Fall plugs allow nurseries to move potting from the busy spring shipping season to a time when labor is more readily available. Conifers are available after Sept 1. A full line is available during dormant season, depending on early orders and shipments.

Promote Your Company with Green Gifts

Do you get calls for inexpensive green gifts? Ever wish you could offer a small item at an event but don't have anything suitable in your own line? Our seedlings, plugs and small potted trees can be tagged with your company name.

We can take all the work out of green promotional gifts. Suitable for trade shows, weddings, memorials, special events or commemorations, green gifts are hot - and we make them easy and affordable. Available options come in two basic formats from our regular wholesale line with optional gift packaging, ready to go.

We'll do all the work. Plugs can be packaged in plastic sleeves, custom printed with white stars across the root zone, then sealed at the top with a four color card. Larger potted plants are available packaged in green or gold gift boxes. The boxes fit over any of the plants growing in the 2 7/8" x 5 1/2" band pots. We can also provide the component trees, bags or boxes for you to assemble and customize.
