<b>Bareroot digging season starts in November and runs through March. Trees are packed every few days and are ready, in the cooler for prime planting season, generally Feb 15 to April 1. Plugs and pots are ready almost year around. **Planting after April 1 is by election of the grower. Trees planted after April 15 are not guaranteed.**</b>						
<b>If planting after April 15 is un-avoidable, water and mulching is suggested. Watering throughout the first summer may be required for very late plantings.</b>
