Bareroot digging season starts in November and runs through March. Trees are packed every few days and are ready, in the cooler for prime planting season, generally Feb 15 to April 1.
Plugs and pots are ready almost year around. **Planting after April 1 is by election of the grower. Trees planted after April 15 are not guaranteed.**

If planting after April 15 is un-avoidable, water and mulching is suggested. Watering throughout the first summer may be required for very late plantings.

Fall 2026 - Spring 2027 Options

Seed Source	In house code	Elevation	Orchard/ Native	Gain	*Notes*
Douglas Fir (5) 051/052/053 N Oregon Coast	**1205, 1407**	1500	Timber Orchard	Medium	Although untested, the N Oregon Coast is adjacent to some of the best native Puget Sound seed lots in the world and for that reason, growers have for many years relied on these sources when options are few. Production appears to be relaible.
Douglas Fir 061 Central OR Coast, Depoe Bay to Coos Bay	1300	1500	Native Forest	None	Untested but commonly used for Christmas trees. The Puget Sound and North Oregon Coast are well known, considered good options, have been heavily used. Many growers use this coastal source as a logical alternate when common options aren't available.
Douglas Fir 072, South Coast Coos Bay to California	1196	1500	Native Forest	None	Untested for Christmas trees, the S Coast is used by several Californian growers but not usually used for Pacif NW growers who consider it too far out of the known zones. The 72 plugs are about the size of an egg, used for shallow rocky soils, field transplants for P-1 production or potted trees.
Douglas Fir 251 (6) Dallas	1229	<2000	Private Timber Orchard	Elite	The underlying 251 seed lot is a known work horse for both timber and Christmas trees. This orchard achieved highest forestry gains possible and received the rarely awarded Elite level of improvement. Goal information is propriatary but typical targets are improved disease resistance, fast and straight growth.
Douglas Fir 251 (6) Dallas, Burnt Woods	1227	<2000	Timber Forest	High	The underlying 251 seed lot is a known work horse for both timber and Christmas trees.
